But, according to reports, there is no thought of yielding to the demands of the strike leaders.

"Speaking for myself," said R. S. le Blome of the Blome-Sinek company, which is building the stadium under municipal contract, "I can say that it will be a last ditch fight against Egan and his followers.

The other officials connected with the contest are very much wrought up over Tracy's action. They are all ready to denounce him for his unexpected withdrawal.

John O'Neill will but from other sources if was a ready to denounce him for his unexpected withdrawal.

The complete blow-off will probably ome tomorrow. It was reported here onight that on the trip from Shelby, Tracy and Senator Speer came near engaging in a fistic argument over

stallment.

Now Up to Kearns.

[Special Dispatch to New York Times.]

Great Falls, Mont., June 27.—The question of whether Jack Dempacy will defend his world's heavyweight title against Tom Gibbons in the ring at Shelby July 4 seems to rest with Jack Kearns, manager of Dempsey, tonight. From what can be learned, the only hope of saving the proposed contest from abandonment is the acceptance by Kearns of a financial adjustment which will relieve the tense money situation, which now exists with regard to the bout.

Films May Save 31. Films May Save It.

The withdrawal of Dan Tracy from the management of the bout announced by Tracy this afternoon at Shelby is accepted generally as a forerunner of an official announcement that the bout is off as far as Shelby is concerned. Tracy's withdrawal stresses the precarious financial condition of the bout and the complicated state of affairs which surrounds the proposed match. "I am not prepared to say how soon we shall be able to proceed with work on the stadium. While all the workers did not join the building laborers to day, and may not tomorrow, we can not lone as to justify any grave seer.

John O'Neill, well known mining man, who advanced many thousands to promote the bout together with Archard and James W. Speer, local attorney, were making frantic efforts to get Tracy to retract his withdrawal and return to the fold. They realize that now there is no chance to save the contest from being the biggest bloomer in the history of the Blow-Off Temorrow.

The complete blow-off will probable. The reached last night, but from other sources it was reported that among the important jobs tied up were those of the S. W. Speer was said to have resented the withdrawal of the manager at this crucial moment as the finishing blow to hopes of holding the bout, words passed between them, and only the intervention of friends prevented a hand to hand combat.

In a telephonic communication with Jack Kearns at Shelby, the champion's manager said tonight that he was satisfied the fight would go on as scheduled for July 1, and candidates for office are said to be behind the walkout agitation, hoping to gain the workers walkout agitation, hoping to gain the walkout agitation of Europe's post-war proble smashing exchanges, and threaten to complete the payment of the final installment.

Anti-Klan and Tenant Bills Signed; Ax to Inheritance Cut

Springfield, Ill., June 27.—[Special.]
—Gov. Small signed forty-seven bills, including the anti-kian and tenant relief measures, today. He vetoed the bill which cut inheritance tax rates in two. The governor had the new medical practice acr before him tonight.

The anti-kian bill introduced by Representative Roberts [Rep., Chicago code relating to kidnaping, assault, and disturbances. It prohibits members of the Ku Klux Klan from appearing in public robed and masked to copecal identity. The ordinary penalties for kidnaping, assault, and creating disturbances are masked.

By signing the tenant relief measures Gov. Small extended the provisious of the anti-eviction laws another two years. These bills, introduced by Representative Lyon [Rep., Chicago] at the request of the Chicago Tenants Protective league, prevent landlords from putting leaseholding tenants out

Due to the remarkable success of the Kleen-Heet method of heating, it has become necessary for us to triple our sales and service organizations to even more adequately serve our fast growing number of friends. The demand for Kleen-Heet is stronger than ever; its success is winning new enthusiasts daily.

In addition to our executive office, we have established three ideally located, comfortable showrooms-one on the east side of Michigan Avenue, just north of Randolph Street-the finest showroom of its kind in America; one in Oak Park, and one in Evanston. Each is located conveniently to transportation of all kinds. Unlimited parking space is provided.

Each of these showrooms is thoroughly equipped to demonstrate Kleen-Heet in every particular. We cordially invite you to visit us and inspect the latest developments in household oil-burning systems. You will find your visit thoroughly worthwhile.

Now is the time to equip your heating plant to burn oil. Don't wait until the fall rush is on. Step in at our nearest showroom and let us demonstrate what Kleen-Heet can accomplish for you. Kleen-Heet fits any heating system; your present equipment can be used. No labor, no coal and no ashes with "Heat at the Flick of a Finger" will be your permanent investment. Drop in

Chicago, June 23.—With all due respect to the W. G. N. the undersigned must take issue with the beloved sheet regarding the unfrocked police.

The police department of Chicago is semi-military in character, it has a standard to uphold, and to allow any mammer to dress like a "hick marshal" of a wayside village would be dinastrous to the morale of the entire department. I keenly sympathize with the patrolman

The Helping Hand for Housework

Your best helper for all cleaning is Old Dutch Cleanser because it is so quick and active. It lightens work, and is most economical. Furthermoreit's safe. So you may be sure that everything you clean with it is absolutely clean and therefore hygienic and sanitary.

The secret of Old Dutch efficiency and economy lies in the character of its fine particles. They are flat-shaped, made that way by nature. Free from hard, jagged grit, which scratches the surface, grinds in the dirt, and cannot clean efficiently. Old Dutch particles do not scratch; they erase the dirt. Being flat, they offer more cleaning surface, and do a greater amount of cleaning. That is why Old Dutch does more and better work than anything else you can buy a soob tend briske he out

Excerpts From The Diary of MRS. J. VINCENT BLAKE

Written in Her Home on the North Shore.

"Bud and Marjorie, now that school has suspended, are enjoying their vacation at home as much as they ever did when we lived in the city and went to the country for the summer.

"I am certainly better satisfied, for here I know who their playmates are and they have practically all outdoors for their playground. The beach is near at hand, their playmates, the year round, are children from good homes and every influence is wholesome.

"This morning their Daddy and I watched them playing on the lawn. I told Jim I thought we had certainly done much for their future when we brought them into this environment.

"I believe we have, and we intend to make this their, home permanently."

NEW Markets Created by Science

The KEY
to the New Markets
Created by Science

Today a million of the men who own automobiles are experts in repairing their cars. Half a million men have built radio sets. Another million men use electrical and mechanical devices in a hundred ways in their homes and shops.

It is, these men, who through their own buying and by the influence they exercise on the buying of their less well-informed friends, that cause one automobile to become popular, and another to fail, one tire to sell widely and another to gather dust on the dealer's rack, one brand of paint to gain popular favor while another lass in sale.

Manufacturers can only tell by their sales what these key huyers are thinking what they are advising their neighbors to buy. But advertisers of

Building Material Radios Wallboard
Portable Houses Paints Lumber
Heating Plants Tools Gasoline

and similar products of a technical nature can influence a million of these men who are the key to this new market created by science by advertising in Popular Science Monthly.

OST men remember when automobiles were called "horseless carriages", when airplanes were considered impractical, when radio was unknown. This was just a few years ago.

Today there are 11,000,000 people operating automobiles, a million and a half motor trucks are in daily use, there are radio sets in three or four million homes.

As new devices have been perfected in the laboratories manufacturers have taken them into their factories and put them on a quantity production basis—Westinghouse Motors, Radiolas, Goodyear Tires, General Motors products, Champion Spark Plugs and a thousand other products of science are used daily by millions of people.

Applied science is fast becoming universal. Naturally there is a growing portion of the public to whom automobiles, radio, electricity and the hundreds of other modern applications of science are matters of intense personal interest.

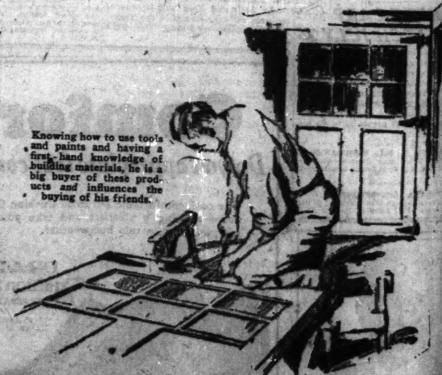

It is from these men who have become expert in the care and repair of their cars, who have become expert through building their own radio sets, who have become expert through the personal use of electrical and mechanical conveniences that Popular Science Monthly is securing its steadily increasing number of readers.

Fifty years ago a few hundred men read Popular Science Monthly. Today, with 250,000 circulation, Popular Science Monthly is read by a million men. As applied science enters more and more into every-day life the circulation of Popular Science Monthly goes steadily upward.

The million men who read Popular Science Monthly are merchants, lawyers, clerks, mechanics, students, executives. They are found in all walks of life, but wherever you find a Popular Science Monthly reader you find a man who is intensely practical, a man who is an expert in things mechanical.

The Home Workshop pages of Popular Science Monthly show, him scores of things he can make himself and dosens of new ideas he can use in his home

Just a pleasant, clean cut young chap, neither too tall nor too small, with an abiding interest in your affairs, the affairs of his fellow men, his wife—and, of course, his own business—which, by the way, he never mentioned unless asked a leading question.

He started wearing tortoise shell glasses in the films because one time he tried some on and he thought he was a sight. Heights don't make him dizzy—but he likes to live, therefore doesn't take any more chances than the law allows. He wants to know what the public wants—straight comedy or something behind? He asks for advice, takes a hint—and admires the pictures on your wall. more, they came about as near doing it as one would care to witness. In some respects they even exceeded it.

Tito Schipa—who, if my own preference is taken, will do all my lyric tenor singing for me—was the Edgardo. Graziella Pareto, who is rapidly becoming my favorite coloratura soprano, was the Lucia. There were also Giuseppe Danise, Enrico in the opera, one of the best of the generation in baritone parts of this variety, and Virgilio Lazzari, who has been transferred from the Auditorium this summer to show how Italian basso is summer to show how Italian basso parts ought to be sung. Mr. Carter has been living quietly in Indiana of recent years, but has grown restless and has made up his mind that the melodrama is due for a renaissance. "The Crash," written by him in collaboration with Ralph T. Kettering, is soon to be rehearsed and equipped here with an educated locomotive as its central figure, and two more plays of his authorship—"While the Devil Laughs" and "Kit of the Relay "—are 'in Kettering's hands, waiting to be given their final touches. If "The Crash" goes well (it starts its journeyings in Iowa in September) its sponsor, they say, is pretty sure to set up shop here again.

Out of the past also comes Miss Flora Finch, famous in the early days of the movies as the comedienne in the John Bunny petures. She is to recemerge presently as a player in "Brains, Inc.," the Edward Lasks comedy in which Robert Ames is to have the leading rôle.

A traveler, newly returned from Holland, reports that George Kaufman and Marc Connelly's "Dulcy" is doing well in Amsterdam, where they call the piece "Dulcy Hilft" ("Dulcy Helps.") The Hollanders, he says, miss a good many points which we liked, but atone for it by finding in the play numerous laughs which American

ENGAGED

HOW TO BE HAPPY THOUGH MARRIED

BY DORIS BLAKE

Men get tired of the same things to eat, the same game, the same old round. Variety is essential to their mental health. They are not peculiar in their love of variety, for it, goes with the ability to progress.

A well known English author supposed to be up on the subject of feminine psychology remarked that it was an excellent plan for a wife to change the way she wore her hair. Very likely he confined himself to the hair, as a feeling the change in style where

Mr. and Mrs. Harry H. Haynie of

and the evening wore away placidly he diplomatically began to probe for information. He was informed that he had admired Barbara La Marr at a film the preceding evening and wife had decided to be another Barbara. As wife was a sunny taced, diminutive blonde, the effort to rival the film beauty was too much for husband's dignity and he laughed himself hoarse.

But there is a great deal of tact in doing the hair at a different angle, as the English author suggested. Safe surprises are worth an effort.

My mind was on my letter of introduction, I walked with dignity into the office, straight over to a young man, and asked, "Are you Miss Arnold?"

He replied he was not, and I departed.

New Liquid Puts 7-Day Curl In Straight Hair

Takes Only 15 Minutes-No Fuss-No Bother

Women everywhere are talking about Domino Curiettethe wonderful new liquid which in
15 minutes makes straight hair
gloriously curly and wavy, and
keeps it so for a week or more.

It's almost miraculous, the way it
works. You just apply a few drops
to the hair. Then use your favorite
irons to shape and place the curls
the way you like best. Or if you
wish and have the time to spare you
can use ordinary kid or silk curiers.
In either case you will be just delighted with the beautiful wavy hair
you will have acquired. Domino

In reported losses, or at any rate to make it fair.

It requires only one eye and a moderate amount of reasoning power, to note that the present system is catching some meanler corporations are shown by

majors of the 1919 income tax figures, aich show that few corporations capitalized at more than \$60,000,000 paid wer 10 per cent. From \$50,000 up arough the three million class the average return is well over 15 per cent, and low \$50,000 it is even higher. The lig profits noted for even smaller agregates of capital indicate intensive ersonal management or rapid turnever, uch earnings, although they may be alled returns on investment, are really a form of wages—the wages of competence. When such businesses are incorporated the corporate name is really an alias for the entrepreneur.

Decline for a great weak wealth is tagged in corporate or real estate records, can't very well wriggle out of it, except by buying tax exempt, or creating trusts and transfers. The poor man who works for a corporation can't dodge. But there are several million folks who either keep no books or can keep more than one set. They have no books kept on them, as they sign no pay rolls. Everybody who believes that all of these people are making full returns deserves a medal for his confidence in his fellow man.

> Miller experts have led the world for five years in developing more mileage features!

IT requires more than good materials to make a good tire. Building in exceptional service is the result of Miller methods, expert workmanship and proper materials.

Geared-to-the-Road Flat Tread Cords Miller Cord builders originated the center running strip, which is now almost universally adopted. They built the first successful flat top cord, which increases mileage and gives greater protection against slipping.

Balanced Supple Carcass

Now again Miller leads. This time in the production of a buoyant, supple carcass. Years of development have perfected balance and increased flexibility that give maximum strength with minimum weight

Uniform Cord Construction Another distinctive Miller improvement is Another distinctive Miller improvement is positively uniform cord construction. The strain of wear is equally distributed over the entire carcass. Cords are laid on evenly. Every ply takes its equal load. That is why you can always be certain of getting full, satisfactory mileage from every Miller Cord.

Buy a Miller Geared-to-the-Road Cord and let it prove to you that these developments mean more cord service at lower cost. Authorized Miller dealers insure proper treatment.

Industrial Bonds

We have specialized for many years in First Mortgage bonds of successful Companies engaged in essential industries—that is, industries which supply commodities required in the daily life of every community, such as coal, newsprint paper, and iron and steel products. Many of these issues, originally well secured, have been reduced by serial payments until the margin of safety is now unusually large. A few selections from our present list are given

A Distinctive Background for Bond Offerings

EXPERIENCED INVESTORS recognize that the Union Trust Company has distinctive advantages as a Bank of issue for high grade bonds and securities:

- -54 years of active commercial banking experience, in contact with most of the important industries and lines of business in which bond issues originate.
- —Information and data files of the most complete and searching character, tracing the growth of business for half a century and analyzing the essentials of successful operation as a basis for judging security values.
- -Banking facilities and officials that assure to the issuer of bonds invaluable counsel and support.
- —A market as extensive as the confidence of 60,000 banking customers and this Bank's prestige among thousands of correspondent banks, bond dealers, corporate and individual investors throughout the country.

Safety is the first requirement in all issues which this Bank offers. Money laboriously accumulated is too often invested on impulse. To safeguard the investor by trained financial judgment and exhaustive investigation is a fundamental policy of this old and conservative Bank.

Investors are cordially invited to visit our bond department on the third floor and avail themselves of our fund of investment information. Current list of high grade securities yielding 4 1/4 to 7% on request

THE UNION TRUST COMPANY, CLEVELAND, OHIO, TRUSTEE

The Company agrees to pay interest without deduction for any Normal Federal Income Tax not in excess of 23, which it may lawfully pay at the source. Pennsylvania and Connecticut four mills tax, Massachusetts income tax not in excess of 6%2 and Maryland ascurities tax refundable on income derived from these notes to holders resident in the respective states, as provided in the trust agreement.

Mr. C. V. Kellogg, President of the Company has summarized from a letter to us as follows:

Company has grown from a small business orginally organized in 1898 with an investment of approximately \$10,000 to its present position in the industry with net assets approximating \$2,600,000. The gross sales during that period have grown from \$312,000 in 1898 to over \$4,000,000 in 1922. For 1923 the gross sales are expected to approximate \$5,500,000.

The Company, incorporated under the laws of the State of Maine, is one of the largest concerns of its kind in the country engaged in the sale of steam and hot water heating apparatus, including boilers and radiators, as well as plumbing supplies, pipe and fittings. The Company has the exclusive distribution west of Ohio of the cast iron boilers manufactured by Pierce, Butler & Pierce Manufacturing Corporation, and is one of the largest single distributors of the famous Kewanee boilers and radiators.

The Company maintains branch offices and ware-

value of \$666,361.50, as appraised by Coates&Burchard Co. These properties are modern and well constructed and by reason of their location in the business districts of the respective cities appraisant.

SECURITY: The 61/2% Serial Gold Notes will be a direct obligation of the Company. As of December 31, 1922, and after giving effect to the present financing, the Company will have available for this issue net tangible assets approximating \$2,600,000 or more than \$3,200 for each \$1,000 note, and net quick assets of \$1,712,506 or over \$2,140 for each \$1,000 note.

EARNINGS: The Company's gross sales after all sales discounts have shown a steady growth from year to year. For the six calendar years ending December 31, 1922, the average of the net earnings after amortization and depreciation, but before taxes were equal to \$283,690, or approximately 5½ times the annual interest charges on these notes.

PURPOSE OF ISSUE: The proceeds of these notes will be used to retire mortgages on the property now owned by the Company and to reduce outstanding indebtedness.

How to Invest July Funds?

TOPICS iefly discussed in

IN THE CURRENT ISSUE of "Safe Bonds for Investment" you will find a gathering of reliable information about the principal types of bonds and bond market conditions in general—such as will be useful when planning the orig-inal investment of funds or the rein-vestment of interest from present bond holdings.

This information is in addition to selected lists and descriptions of bonds which we offer for conservative investment at this time.

Bonds that Fit Individual Requirements

Whatever an investor's requirements may be—as to yield, maturity, marketability, taxable status or type of bond investment—they can be accurately suited from our lists of Public Utility, Industrial and Foreign Government issues or tax-exempt U.S. Government, Municipal and Joint Stock Land Bank bonds.

Opportunity for Diversification

Halsey, Stuart & Co. bonds are usually available in denominations of \$100, \$500 and \$1000. This enables the investor of moderate means to diversify his holdings as thoroughly as the large investor. Definite suggestions are included in our July Investment booklet, for the well-balanced investment of funds of from \$500 to \$25,000.

Ermita Sugar Company

First Mortgage Twenty-Year 71/2 Per Cent Convertible Sinking Fund Gold Bonds

(Closed Mortgage)

Dated December 15, 1922

Due December 15, 1942

Convertible into voting trust certificates for common stock at the rate of 29 shares for each \$1,000 principal amount of bonds

Annual sinking fund commencing 1923 sufficient to retire entire issue by maturity

crued interest up to and including December, 15, 1932, the premium there-after decreasing % of 1 per cent annually to maturity.

The information herein contained is summorized by Mr. Robert W. Atkins, Chairman of the Board of Directors of the company, from his letter.

PROPERTY: The Ermita Sugar Company is a self contained, low cost sugar producer. The property, which includes a thoroughly modern cane sugar mill, about 9,200 acres of land, and standard gauge railroad, with complete equipment, located in the province of Oriente, Cuba, on the main line of the Guantanamo and Western Railroad. Central Esmita, with an annual capacity in excess of 150,000 bags of sugar, is one of the most efficient producers in Cuba. Operations for the past five crops have shown an average recovery of 12.35 pounds of sugar for each 100 pounds of cane ground, a recovery equaled by few mills. There is an ample cane supply to maintain production at capacity for many years.

SECURITY: These \$1,200,000 bonds are secured, in the opinion of counsel, by a first (closed) mortuage on the entire fixed assets and equipment of the Ermita Sugar Company, subject to a purchase money mortgage of \$7,000 maturing within two years, and constitute its only funded indebtedness. The company, however, may secure short term seasonal borrowings by the pledge of growing crops. Fixed assets of the company were recently apprecised by Mesors. Smith and Ames, leading sugar engineers, at a sound value of \$3,500,30, an amount equivalent to over \$2,900 for each \$1,000 bond. April 30, 1923, balance sheet carried fixed assets at \$2,646,472, or 76 per cent of appraised value. Funded debt amounts to only \$8 per bay of annual capacity.

EARNINGS: The earnings of the Ermita Sugar corporation for the last five years, ended December 31st, 1922, before interest, depreciation and income taxes, have averaged \$265,197. The results of the crop to April 30, 1923, based on actual production of 118,474 bags and final limitation at 53c cents per pound of unsold sugar on hand at that date, show a net revenue of \$658,933 before interest, depreciation and provision for Cuban income tax. As the new company took over operations as of the start of the crop only, no idle season expenses have seen deducted from this revenue. After allowance for a complete dead season expenses have available for interest would amount to \$273,400, or over three times the interest on these bonds.

MANAGEMENT: The present officials will continue in active management of the company. Mr. Robert W. Atkins of the firm of E. Atkins & Co., is chairman of the board of directors. While any of these bonds remain outstanding, all the common stock will be held in a voting trust, control of which will be vested in four trustees, two being chosen by the present stockholders of the company and two by E. Atkins & Co.

... Application will be made to list these bonds on the New York Stock Exchange. Price 100 and accrued interest, to yield 71 per cent.
